SUMMARY

Full Stack Developer with 2+ years of hands-on experience delivering production-grade web applications across EdTech and AI platforms. Specialise in Next.js, React, TypeScript, Laravel, and Node.js — with a track record of building complex systems including a custom video learning engine, real-time grading pipelines, and AI-integrated conversational platforms. Known for clean architecture, measurable performance wins, and working effectively across the full stack. Currently pursuing a BS in Software Engineering while employed full-time.

EXPERIENCE

Full Stack Developer

97 Solutions — Karachi, Pakistan · Feb 2026 – Present

Frontend (Next.js · React · TypeScript · Tailwind CSS)

- Architected responsive Teacher and Student dashboards for a production EdTech platform using Next.js, TypeScript, and Tailwind CSS.
- Engineered a custom interactive video player that syncs with backend timestamps to pause playback and trigger in-video quizzes — a core product differentiator.
- Managed complex global state using React Query and Zustand, covering API caching, real-time grading updates, and UI synchronisation across sessions.
- Built rich multimedia assignment forms supporting voice notes, math formula input, and image uploads for quizzes and open-ended assessments.
- Implemented a secure save-and-resume system with strict client-side routing to track granular student progress and prevent unauthorised retakes.

Backend (Laravel · PHP · MySQL)

- Designed and built comprehensive RESTful APIs in Laravel to manage teachers, students, class enrollments, and multimedia content at scale.
- Built a progress and grading engine tracking precise user state (video timestamps, attempt counts) with dynamic score recalculation on teacher override.
- Developed database architecture and endpoints for cloning, assigning, and organising quizzes, videos, and slides into folders and playlists.

Front End Developer

360 Xpert Solution — Karachi, Pakistan · Feb 2025 – Jan 2026

- Delivered production-ready web applications using Next.js and Tailwind CSS with a focus on performance and maintainability.
- Built AI-powered group chat platforms with real-time messaging, integrating large language model APIs to enable conversational AI features within collaborative workspaces.
- Developed conversational AI web UIs with optimised UX, achieving fast load times and smooth interactions across devices.
- Created employee monitoring dashboards with live data visualisation, responsive layouts, and role-based access.
- Collaborated directly with clients to translate requirements into functional, polished interfaces — consistently delivering on tight timelines.

SKILLS

Frontend	Next.js, React, TypeScript, Tailwind CSS, Zustand, React Query
Backend	Node.js, Laravel, PHP, RESTful API Design
Databases	MySQL, PostgreSQL
Other	Python, Git, Agile/Scrum, AI API Integration (OpenAI)

KEY ACHIEVEMENTS

40% reduction in load times
Achieved through systematic code splitting, lazy loading, and performance profiling across multiple production apps.

25% decrease in bounce rate
Driven by redesigned UI/UX flows, improved accessibility, and faster time-to-interactive across client-facing platforms.

EDUCATION

Bachelor of Science in Software Engineering
Sindh Madressatul Islam University, Karachi · Feb 2025 – Feb 2028

Certification in Web 3.0 & Metaverse (GIAIC)
Governor's Initiative for AI & Computing · Jun 2023

Web & App Development Bootcamp
Saylani Mass IT Training (SMIT) · Jan 2022
